

MAE 657.11 Complete Angle Sets for Construction Profile, Type i Modular System

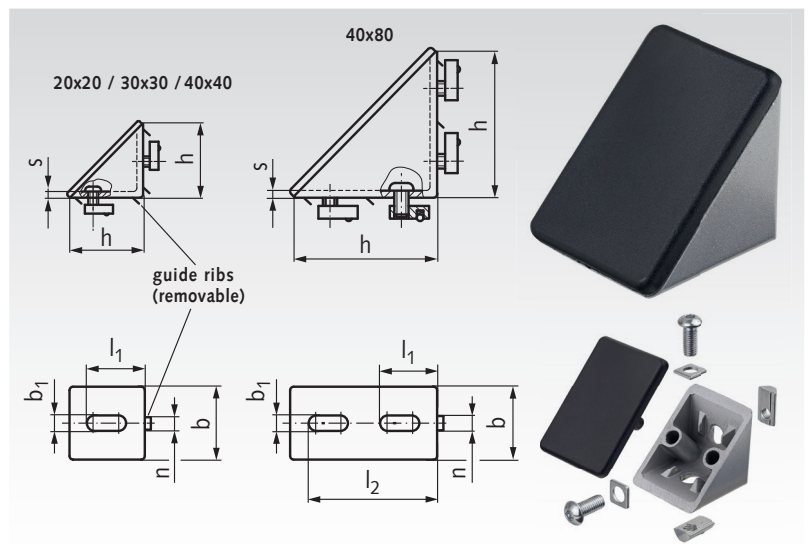

Material:

Angle: Zinc die-cast, white aluminium.
Screws and T-slot nuts: Steel, zinc-plated.
Cover cap: Plastic polyamide (PA), black.

Angles enable the attachment of aluminium profiles to tables, panels, or to each other at a right angle without requiring any machining of the profiles.

The connection can be flexibly positioned and adjusted along the profile slot. To fasten the angle to a panel or perpendicular to the aluminium profile, breaking out the guide ribs is necessary.

Cover caps not only provide an aesthetically pleasing appearance but also facilitate cleaning.

Ordering Details: e.g.: Product No. MAE 657.11-2020, Complete Angle Set 20 x 20 mm
