

MAE 657.14 Caps for Construction Profile, Type i Modular System

Material: Plastic polyamide (PA), black.

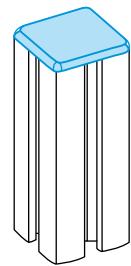

End caps provide an aesthetic finish for the end faces of aluminium profiles and enhance safety by protecting against sharp cut edges.

They also prevent the ingress of dust and dirt into the profiles. Installation is carried out by tapping them into place with a rubber mallet, without any need for additional machining of the profiles.

MAE 657.15 Cable Tie Blocks for Construction Profile, Type i Modular System

Material: Plastic polyamide (PA), black.

Cable tie blocks are used for the organized fastening of cables, lines, and hoses to aluminium profiles.

They are inserted into the profile slot and fixed by turning them 90° using an open-end wrench.

Thanks to the space-saving installation in the profile slot, cables can be routed neatly and bundled clearly without affecting the overall structure.
